Please do **not** answer these questions until **after** you have read the **entire** newsletter. Complete and return this survey to the City by **May 16, using the self-addressed stamped-envelope.**

**I. Sump Pump Discharge Service Line:**

Some neighborhoods in Edina have poor draining soils or high water tables. These homes may have basement sump pumps that discharge water to the yard or the street. If a sufficient number of homes have the sump pumps, the City may install a small diameter drain line along the road to allow residents to connect sump drains, yard drains and roof drains.

A. Does your home have a drain tile/footing drain?     Yes         No         Unknown

B. Does your home have a sump pump?                       Yes         No

Please sketch in the space to the right:  
 your house, garage, driveway, and  
 approximately where **along the ROW**  
**line** you would like the service  
 connection pipe placed.

**II. Residential Roadway Lighting Option:**

Your neighborhood currently has cobra head street lighting. As a part of the roadway residential roadway reconstruction we would consider upgrading the street lighting system by adding new decorative lighting, or replacing the existing lights with new styles. The information that follows will help you select a style appropriate for your neighborhood. All costs associated with improving street lights are assessed to the residents of the area and will vary based on light style and extent of work. Estimated costs for improvement to the street lights are \$2,500 per REU.

The City would replace the lights in the same location as today. Please check whether the number and location of lights are OK or if you would like additional lighting.

\_\_\_ Keep current locations    \_\_\_ Add additional lights @ new locations    \_\_\_ Reduce Lighting

It is also possible to install more basic style lights as shown below.
