I. Sump Pump Discharge Service Line:

- A. Does your home have a drain tile/footing drain? Yes No Unknown
- B. Does your home have a sump pump? Yes No

Please sketch in the space to the right: your house, garage, driveway, and approximately where **along the ROW line** you would like the service connection pipe placed.

II. Residential Roadway Lighting Option:

Many neighborhoods have simple wood-pole intersection lighting systems, or they may have existing decorative lighting systems that are in need of replacement. As a part of the roadway residential roadway reconstruction we plan on upgrading the lighting system by adding new decorative lighting, or replacing the existing poles with new styles. The information contained in this guide will help you select a style appropriate for your neighborhood.

Pole placement will usually be limited to one pole at every intersection and one pole per mid-block between intersections. Your neighborhood may elect to have either intersection only lighting or mid-block lighting which neither of these installations will provide security lighting levels. To give ample security lighting this would require mid-block placement of the poles and intersections.

From the following spacing options, please tell us which spacing you prefer. Rank the spacing options in order from 1 to 2 on the lines provided below (1 being the most desirable).
